PROJECTS

Price Prediction in Airbnb Berlin (CareerFoundry Data Analytics Program) 2022

- Goal:** Analyze variables impacting the price and demand of Airbnb Listings. Predict optimal rental price in Berlin's Airbnb listing using **Linear Regression**.
- Process:** Compared the correlation between different variables with **Python Libraries**. Created **visualizations** with **Tableau**. Used **Jupyter Notebook, Seaborn, Folium, sci-kit-learn, and Geopy** extensively.
- Outcome:** Compelling **Python** and **Tableau** presentation using Machine Learning Algorithms (linear regression and clustering) and analysis of the model performance statistics.

Instacart Basket Analysis (CareerFoundry Data Analytics Program) 2022

- Goal:** Perform an exploratory analysis of Instacart Grocery Basket to identify the variety of customers in the Instacart database. Explore the purchasing behaviors to create a targeted marketing strategy and marketing campaigns using Python.
- Process:** Analyzed historical data (34 million rows) using **Python Libraries**, derived new variables, **merged and grouped data**, and reported final results with **Excel**. Used **Jupyter Notebook, Pandas, Seaborn, Scipy, Numpy, and Matplotlib** extensively.
- Outcome:** Report with data flow, visualizations, and answers to business questions.

Rockbuster Top Customer Analysis (CareerFoundry Data Analytics Program) 2022

- Goal:** Conduct a strategic analysis of movies. Discover the most loyal customers of a movie rental company. Inspect the demographics & spending behavior across the customer base.
- Process:** Extracted data from 16-table SQL database, used **PostgreSQL** for Database querying, filtering, cleaning and summarizing, and joining tables. Produced visualizations in **Tableau**, and presented final results in **PPT**. Used **subqueries, CTEs, JOINS, aggregation functions, and commands** excessively.
- Outcome:** compelling **Tableau** presentation drilling down to the top 5 clients

PROFESSIONAL EXPERIENCE

Account Manager, Civil Bank Limited

2017-2020

Kathmandu

- Used Finance and Accounting skills along with Business Intelligence tools to analyze the market growth and financial strength of corporate customers.
- Analyzed the credit strengths of **200+ prospective borrowers** in a year to make loan recommendations
- Acted as a credit risk officer for the assessment of the overall business and financial strength of corporate clients, SME clients as well as retail clients.
- Managed **USD 15 million+** of credit portfolio.
- Analyzed portfolios of **150+ long-term customers** periodically to identify weakness trends sending alerts to respective departments about deteriorating conditions
- Used **Excel and Tableau** for preparing Dashboards and analysis

Account Manager, NIC ASIA Bank Limited

2017-2017

Kathmandu

- Acted as a consultant to **150+ customers** and a resource to the Bank in developing and retaining business.
- Evaluated **100+ borrowers' financial status, credit**, and property and made recommendations on pursuing loans
